

A148 - Grip 13 Nitrile High Dotted Glove

Collection: General Handling

Range: HAND PROTECTION

Materials: Acrylic, Polyester, Elastane

Dipping:

,

Inner Pack: 12

Outer Carton: 144

Product information

The Portwest A148 Grip 13 Nitrile High Dotted Glove is a high-performance work glove engineered for precision handling, superior grip, and enhanced durability. Designed with advanced materials and ergonomic comfort, this glove is ideal for use in industries where control, protection, and silicone-free properties are essential. The nitrile dotted palm offers outstanding grip and control, especially when handling slippery or delicate items, improving efficiency and safety. Its silicone-free construction makes it perfect for environments where silicone contamination must be avoided, including automotive manufacturing, paint lines, electronics, and glass handling. Providing contact heat resistance up to 100°C, the glove adds an extra layer of protection for tasks involving warm components or surfaces. The multi-layer design enhances abrasion resistance and extends the glove's lifecycle, reducing the need for frequent replacement. Constructed with an ergonomic fit, the glove helps reduce hand fatigue during prolonged use, supporting greater productivity and comfort. A seamless 13 gauge liner ensures a precise fit and high dexterity, making it suitable for fine handling applications. The nitrile foam coating delivers excellent grip in both wet and dry environments, enhancing versatility across tasks. Manufactured without dimethylformamide (DMF), the glove supports a healthier workplace and improved skin safety. Fully CE certified, the A148 meets relevant PPE standards for reliable protection and quality assurance.

General Handling

The General Handling and Grip Glove category is still one of the most popular collections within Portwests' Hand Protection Range. A carefully selected range of coatings, including Latex, Nitrile, Polyurethane and PVC, provides a broad range of styles suited to a diverse range of tasks.

HAND PROTECTION

A wide and increasing range of Hand Protection styles is available. In order to help cater to every need. Only the best materials and manufacturing methods are used in the production of Portwests' extensive range of Hand Protection products.

Standards

ANSI/ISEA 105 - 2016 CUT Level (A2)

ANSI/ISEA 105 - 2016 ABRASION Level (6)

ANSI/ISEA 105 - 2016 PUNCTURE Level (2)

EN ISO 21420:2020 Dexterity 5

EN 388:2016 +A1:2018 (4X21A)

EN 407:2020 (X1XXXX)

- Warm 10 gauge acrylic liner for cold protection
- Nitrile foam coating for excellent grip in wet and dry conditions
- Nitrile dotted palm for enhanced grip
- Reinforced thumb crotch for extra protection and durability
- Silicone free - Ideal for manufacturing, paint applications, electronics and glass handling where silicone is problematic
- Provides over 200°F contact heat protection
- Good abrasion resistance and longer lifecycle due to multi-layered design
- Ergonomic design to reduce hand fatigue
- DMF Free
- New style
