

#### PRODUCT SPECIFICATION & TECHNICAL DATASHEET

# FP01 - Temporary 20m Horizontal Lifeline

Collection: Anchorage Device

Range: Height Safety

Materials: Polyester, Alloy Steel, Heat Treated

**Outer Carton:** 4

#### **Product information**

Constructed with precision engineering and rigorously tested to meet industry standards, the temporary horizontal lifeline is quick and easy to install, extending up to 20 metres in length. Once elevated, this lifeline allows up to two workers to move safely along the line.

Anchorage devices are common fall protection solutions in work areas that lack existing anchor points for personnel tie-off. They are certified to the EN 795 standard, making them approved anchor points for any elevated work area that poses a risk of fall to the worker. These points are responsible for connecting the user to a lifeline or lanyard making them must-haves for the safety of workers at height.

#### **Height Safety**

Height Safety is put in place to prevent the risks associated with falling from heights, reducing impact force, restricting obstacle/ground collision and restricting users from fall hazard areas. Portwest offer a full range of Height Safety products for working at height.

## **Standards**

EN 795:2012 Type C

# **Features**

- · Quick and easy installation
- $\bullet$  Can be used by two workers at the same time
- Attached Bag for Easy Transport and Storage
- $\bullet$  No additional tools required
- Ratchet tensioner for quick and easy adjustments
- Max rated load 100kg
- $\bullet$  10 Year shelf life from manufacturing date outlined in product label
